## Stainless Steel Spark Plugs

Champion Stainless Steel Spark Plugs have an extruded copper core in the center electrode that maintains accurate control of heat range, optimizing the performance and longevity of the spark plug. They start easily and won't rust or oxidize.

The electrodes on Champion Stainless Steel Spark Plugs use a Heat-Active™ alloy to reach operating temperatures quickly and maintain stable operating temperatures under varying engine loads.

Champion Stainless Steel Spark Plugs also have a patented Mag Suppressor that provides maximum protection from radio & electronic ignition / ECU frequency interference.
